ABSTRACT:

PURPOSE: To provide the titled composition of outstanding heat and moisture resistances, internal plasticity, etc., suitable for insulating materials for electric and electronic parts, comprising, as essential component, specific dicyclopentadiene-phenol-modified epoxy resin.

CONSTITUTION: The objective composition comprising, as essential component, a dicyclopentadiene-phenol-modified epoxy resin of formula (R is H or 1.9C alkyl; n is 0~15) (e.g., dicyclopentadiene-p-cresol-modified epoxy resin). This resin can easily be prepared by polymerization between dicyclopentadiene and a phenol followed by subjecting to glycidyl-modified reaction.
